### Forehead Dissectors, Areola/Breast Markers & Rake Retractors

Forehead and Endo Brow Dissectors are designed to fit the facial contours and provide effective dissection during forehead lift, brow lift, facial implant, ocular and other facial related procedures.

Item#	Description
21-50	Scalp Elevator Dissector, 9-1/2" (24 cm) length, curved, 7mm wide blade with Cottle style tip
21-51	Frontotemporal Dissector, 9" (23 cm) length, curved, 7mm wide blade with beveled sharp edges
21-52	Frontotemporal Dissector, 9" (23 cm) length, straight, 10mm wide blade
21-53	Corrugator and Procerus Muscle Dissector, 9" (23 cm) length, S-shaped 5mm wide blade

Freeman Areola markers are ideal for accurate marking of the areola prior to incision during breast reconstruction or augmentation procedures. Center aperture opening has 4-directional markings designed for easier nipple centering and alignment. Semi-sharp edge helps to lightly scribe the skin and can be used with or without gentian violet ink.

Item#	Description
21-734	FREEMAN Areola Marker, improved pattern, 34 mm diameter
21-736	FREEMAN Areola Marker, improved pattern, 36 mm diameter
21-738	FREEMAN Areola Marker, improved pattern, 38 mm diameter
21-742	FREEMAN Areola Marker, improved pattern, 42 mm diameter
21-745	FREEMAN Areola Marker, improved pattern, 45 mm diameter
21-750	FREEMAN Areola Marker, improved pattern, 50 mm diameter

21-738

McKissock Breast markers are ideal for breast reduction procedures and delineating areas of breast tissue to be excised. Keyhole leg extensions are graduated in centimeters for precise adjustments and measurements. Manufactured from quality surgical stainless steel with reliable spring tension and designed to maintain memory of the original pattern. Suggested use in conjunction with Freeman Areola Markers.

Item#	Description
21-838	McKISSOCK Breast Marker, 38 mm Diameter Keyhole pattern
21-842	McKISSOCK Breast Marker, 42 mm Diameter Keyhole pattern
21-845	McKISSOCK Breast Marker, 45 mm Diameter Keyhole pattern

21-838

Freeman Rake Retractors offer a 4-sharp prong design ensuring optimum hold and retraction of dissected tissue. Handle with curved finger grip provides comfortable hold for the clinician or assistant during prolonged periods of skin flap retraction. Ideal for breast, facial and other general surgery procedures.

Item#	Description
21-123	FREEMAN Flap Rake Retractor, 4-1/4" (10.8 cm) length, 4-sharp in-line prongs 1-1/4" (3.2 cm) wide, small curved finger grip on end of handle
21-124	FREEMAN Rake Retractor, 4-3/4" (12 cm) length, 4-sharp in-line prongs 1" (2.5 cm) wide, large curved finger grip on end of handle
21-125	FREEMAN Rake Retractor, 7-1/4" (18.4 cm) length, 4-sharp in-line prongs 1-1/2" (3.8 cm) wide, small curved finger grip on end of handle
21-126	FREEMAN Rake Retractor, 7-1/4" (18.4 cm) length, 4-sharp offset prongs 1-1/2" (3.8 cm) wide, small curved finger grip on end of handle
21-127	FREEMAN Rake Retractor, 7" (17.8 cm) length, 4-sharp in-line prongs 7/8" (2.2 cm) wide, delicate pattern, small curved finger grip on end of handle
21-128	FREEMAN Rake Retractor, 7" (17.8 cm) length, 4-sharp offset prongs 7/8" (2.2 cm) wide, delicate pattern, small curved finger grip on end of handle

The Coronal Brow Lift Retractor offers a wide 7-sharp prong design to ensure optimum hold and retraction during undermining and tissue dissection. Handle with curved finger grip provides comfortable hold for the clinician or assistant during prolonged periods of skin flap retraction. Ideal for facial and other general surgery procedures.

Item#	Description
21-129	CORONAL BROW Lift Retractor, 7-1/4" (18.4 cm) length, 7-sharp offset prongs 2-3/4" (7 cm) wide, small curved finger grip on end of handle

The modified and improved Yancoskie Abdominal Retractor offers 6-sharp in-line prongs designed for reliable and consistent grip of the abdominal fascia during dissection, positioning and exposure to the operating field. Robust yet lightweight ergonomic design with rib grip handle minimizes hand fatigue to the clinician or assistant during lifting or prolonged periods of abdominal skin flap retraction.

Item#	Description
21-130	YANCOSKIE (modified) Abdominoplasty Retractor, 7-1/2" (19 cm), 6-sharp in-line prongs 6" (15.2 cm) wide, lightweight design with ergonomic rib grip handle
